

Solenoid Controlled Relief Valve 7.9 to 100 gpm 3045 psi

Features

This valve adds a wet type solenoid valve to a balanced type piston type relief valve to form a hydraulic device unload circuit. The shockless type has an internal structure that prevents shock generated during unloading. This valve can also be used in a pressure relief circuit, and has a maximum adjustment time of three seconds. See the pressure relief circuit example.

A two-pressure control circuit can be configured by adding a relief modular valve. Contact your agent for more information.

(Pressure Relief Circuit Example)

(Two-pressure Control Circuit Example)

Note: For information about electrical specifications, see the SS type and SA type solenoid valve items on pages D-4 and D-16.

• Handling

- To adjust pressure, loosen the lock nut and then rotate the adjusting bolt clockwise (rightward) to increase pressure or counterclockwise (leftward) to decrease it.
- To adjust the time from onload to unload, loosen the lock nut and rotate the restrictor adjusting bolt clockwise (rightward) to make the time longer, or counterclockwise (leftward) to make it shorter.
- Make sure that tank port back pressure is no greater than 29 psi.
- The ** before the design number in the model number of the solenoid valve used shows voltage. See the voltage symbols in the model number explanation.

- Pressure becomes unstable when at slow control flow rates. Use a flow rate of no less than 2.1 gpm for the 03, 06 sizes, and 2.6 gpm for the 10 size.
- Use 90 to 110% of rated voltage.
- The pressure adjustment range for the high vent type is 188 psi. Note that RSS (RSA) -T/G03 is not a high vent type.
- Use the following table for specification when a sub plate is required.

Model No.	Pipe Diameter	Weight lbs	Applicable Valve Type
MR-03-E10	3/8	3.5	RSS (RSA) -G03-**-**-15
MR-06-E20	3/4	7.7	RSS (RSA) -G06-**-**-23
MR-06X-E20	1		
MR-10-E20	1 1/4	18.7	RSS (RSA) -G10-**-**-23
MR-10X-E20	1 1/2		

Note: See page relief valve page item on I-3 for dimensions.

- The following are the bundled mounting bolts.

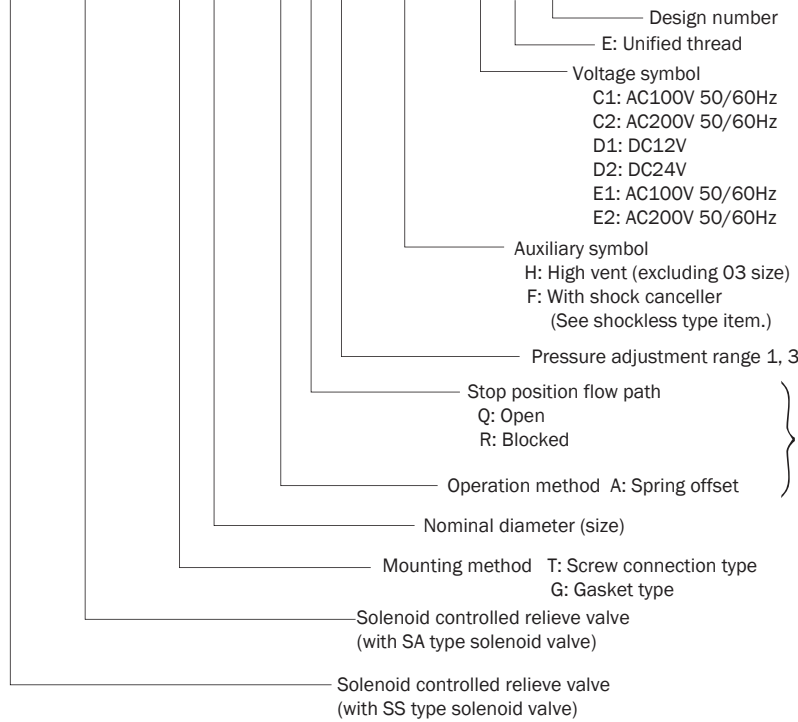

Model No.	Bolt Dimensions	Qty	Tightening Torque ft lbs
RSS (RSA) -G03-**-**-15	3/8-16	4	33 to 40.5
RSS (RSA) -G06-**-**-23	5/8-11	4	140 to 173
RSS (RSA) -G10-**-**-23	7/8-9	4	272 to 339

Note: For mounting bolts, use 12T or equivalent.

- The coil surface temperature increases if this pump is kept continuously energized. Install the valve so there is not chance of it being touched directly by hand.

Understanding Model Numbers

RSS (RSA) - G 06 - A Q 1 - (H) - C1 * 23

Other auxiliary symbols can be used
(enter them in alphabetic order if there are 2 or more).

With SS type solenoid valve	G, N, Q (R is omitted).
With SA type solenoid valve	GR, J, N, Q, R

Not required with
the shockless type.

Installation Dimension Drawings
